modes for better drug management

OLED screen, user-friendly interface to administer aerosol therapy

Single button operation, easy to use menu

>3h long lasting rechargeable battery

Ergonomic design, lightweight

CleverNeb Duo-50 is a new-generation nebulizer offering patient-specific aerosol therapy. It pairs customizable flow rates—for infant, pediatric, adult, and high-capacity adult profiles—with breath-actuated dosing and minute-precision timing. This tailored approach adapts to each patient's clinical needs, maximizing accuracy while minimizing medication waste. Housed in a lightweight, hangable design, it features single-button OLED operation and over three hours of cordless runtime.
